

Public Issue Report: Village Mein Serious Paani Ki Problem

Title: Village ka Handpump Kharab Hone Ki Wajah Se Paani Ki Serious Problem

Location: Hesalong Village, Chas Block, Bokaro District, Jharkhand

Background

Hesalong village ke log pichhle kai hafton se serious paani ki problem face kar rahe hain. Village ke main area mein jo handpump tha, woh kharab ho gaya hai aur ab usse paani nahi aa raha hai.

Village mein clean drinking water ka koi easily available alternative source nahi hai. Is wajah se logon ko paani collect karne ke liye kaafi door jana pad raha hai.

Problem Description

Village ke main area ke paas wala handpump lagbhag teen mahine pehle kharab ho gaya tha. Starting mein villagers ko laga tha ki handpump jaldi repair ho jayega.

Lekin local authorities aur representatives ko inform karne ke baad bhi abhi tak iska permanent repair nahi hua hai.

Village ke kai families daily drinking, cooking, cleaning aur sanitation ke liye isi handpump par depend karte the.

Women, elderly people aur children ko sabse zyada problem ho rahi hai kyunki unhe paani lane ke liye kaafi door jana padta hai.

Community Par Impact

Clean water available na hone ki wajah se village ke logon ko bahut problems face karni pad rahi hain. Approximately 300 families is issue se directly ya indirectly affected hain.

Major problems hain:

- Clean drinking water milne mein difficulty.
- Women aur elderly logon ko extra mehnat karni pad rahi hai.
- Children ka kaafi time paani collect karne mein waste ho raha hai.
- Unsafe water use karne se health risks ho sakte hain.
- Proper hygiene aur sanitation maintain karna difficult ho gaya hai.
- Economically weaker families ko extra financial problems face karni pad rahi hain.

Previous Actions

Villagers ne local representatives aur concerned authorities ko is problem ke baare mein inform kiya hai. Lekin abhi tak handpump ka permanent solution nahi hua hai.

Requested Action

Concerned department se request hai ki:

- 1. Handpump ka immediate inspection kiya jaye.**
- 2. Handpump ko jaldi repair ya replace kiya jaye.**
- 3. Permanent solution hone tak safe drinking water ki temporary arrangement ki jaye.**
- 4. Village mein additional water facilities ki requirement check ki jaye.**
- 5. Future mein aise issues prevent karne ke liye proper maintenance system banaya jaye.**

Conclusion

Clean drinking water village community ki basic need hai. Handpump ke itne samay se kharab rehne ki wajah se bahut saare residents affected hain. Isliye is problem ka urgent solution zaroori hai.
