

SMART INDIA HACKATHON 2026

INNOV8

- **Problem Statement ID – SIH26043**
- **Problem Statement Title-** A digital platform to crowdsource societal challenges and facilitate collaborative problem solving through universities and industry partnerships
- **Theme-** Disaster Management
- **PS Category-** Software
- **Team ID-**
- **Team Name (Registered on portal) – INNOV8**

❖ Proposed Solution

- **Citizen Challenge Submission:** A web platform to submit societal challenges with **multimedia evidence** and **location details**.
- **AI-Powered Multilingual Problem Intelligence:** Enables citizens to submit challenges in **local languages**, with AI translating, categorizing, prioritizing, and **detecting duplicate challenges** for standardized processing.
- **Smart University Matching:** Routes validated challenges to **universities, faculty, and research centres** based on expertise.
- **University-Industry Collaboration:** Connects projects with startups, MSMEs and CSR organizations for mentorship, funding, and implementation.
- **Government Analytics Dashboard:** Provides real-time insights into challenges, institutional and industry engagement and project progress.

Frontend: Next.js, React, TypeScript, Tailwind CSS

Backend: Java, Spring Boot, Spring Security, REST APIs, WebSocket

Database: PostgreSQL, pgvector (for semantic search)

AI & ML: Python, FastAPI

Embeddings: Pre-trained models for semantic matching

AI Features: Problem Classification, Priority Scoring, University & Industry Matching

Authentication: JWT, Role-Based Access Control (RBAC)

Feasibility:

- 1.ProvenTechnology: Uses scalable web, AI, and cloud technologies.
- 2.Modular Design: Enables phased implementation and easy expansion.
- 3.Cloud Scalable: Supports district-to-statewide deployment.
- 4.Cost Efficient: Uses open-source and existing infrastructure.

Viability:

1. Government Adoption: Centralizes societal challenge management.
2. University Value: Enables real-world research and student innovation.
- 3.Industry Participation: Enables mentorship, funding, and technology support.
- 4.Ecosystem: Connects citizens, academia, government, and industry.

Challenges:

1. Data Quality: Managing inaccurate or duplicate submissions.
- 2.AI Accuracy: Ensuring reliable classification and matching.
- 3.User Adoption: Encouraging participation across stakeholders.

Use Cases:

1. Citizens: Report and track societal challenges.
- 2.Government: Validate, assign, and monitor projects.
- 3.Universities: Form teams and develop solutions.
- 4.Industry: Provide mentorship, funding

Business Potential:

1. CSR Funding: Directs CSR toward verified societal challenges.
- 2.Innovation Ecosystem: Connects problems with solution providers.
- 3.Startup Creation: Enables entrepreneurship and technology transfer.
- 4.Social Impact: Measures outcomes and community benefits.

❖ Benefits of the solution

Social :

- Enables citizens to report local challenges through a structured platform in their preferred language.

Educational :

- Connects universities with real-world challenges for research and student projects.
- Encourages multidisciplinary collaboration and experiential learning

Smart Governance:

- Provides centralized monitoring of challenges, projects, and outcomes.

Economic Growth:

- Transforms successful solutions into startups, patents, and technologies.

Environmental Solutions:

- Promotes solutions for agriculture, water, environment, and rural development.

❖ Potential Impact on Target Audience:

Citizens & Communities

Better visibility and resolution of local challenges.

Government Departments

Data-driven monitoring and efficient resource allocation.

Society

Scalable solutions with measurable social impact.

Existing Ecosystem

Problem Reporting → Challenge/Competition → University/Industry Collaboration

Our Integrated Ecosystem

Citizen → AI → University → Industry → Prototype → Pilot → Deployment → Impact

Our platform integrates the complete societal innovation lifecycle into a single collaborative ecosystem
